

++ Annual ++ NURSE EQUIPMENT CALIBRATION

Calibrate your nurse equipment every year. This ensures accurate readings.

CALIBRATING
SINCE
1969

What We Do:

Calibrate 4 Equipment Types

WHO

Calibrating nurse equipment since 1969
Veteran & family owned.

WHAT

We inspect, service & calibrate 4 types of nurse equipment: audiometers, vision testers, weight scales, blood pressure gauges

WHY

We service nurse equipment every year to ensure the equipment is functional and accurate during annual student health screenings.

WHEN

Annual service/calibration is recommended by OSHA, ANSI (American Natl Standards Inst.) and State guidelines.

Calibration & Service

* Almost all makes & models

AUDIOMETERS

VISION TESTERS

BLOOD PRESSURE GAUGES

WEIGHT SCALES

Are your Audiometers Annually Calibrated to meet OSHA, ANSI, & State Requirements?

Nurses are professionals and use technical calibrated measuring instruments. It is recommended that measuring instruments be serviced for proper function and calibrated for accuracy each year.

Audiometer Special Sale

Includes all the basic features that most nurses require.
